

DON'T JOIN THE WALKING DEAD

Walking safely is really just about using your brain. When people walk around mindlessly, they get hurt or killed. Out of all the deaths that occur on Delaware roadways, 1 in 4 is a pedestrian death. And for every pedestrian killed, 12 more are injured.

Things you can do to avoid walking toward a dead end:

- Do not walk under the influence of drugs or alcohol.
- Cross only at crosswalks or intersections with signals or traffic signs.
- Do not step into a crosswalk if it will create a hazard to motorists, even though you have the right of way.
- Use sidewalks. If there isn't a sidewalk, walk facing traffic and as far off the edge of the road as possible.
- Carry a flashlight or other reflective items when walking at night.
- Do not hitchhike.
